

Top Burner

Open Top Burner Series

2907G0003

2944G0004

Description

The Robertshaw® Open Top Burner Series was developed with the goal of offering a cost effective open top burner to the gas appliance industry. With the option in porting pattern, design, and ignition preference, we offer countless options for freestanding and RV ranges. Each burner must be a direct replacement in order to pass agency standards and provide clean combustion. Port pattern, burner height, ignition source, venturi bends, and air shutter openings have influences on combustion. The Robertshaw Open Top Burners can be found in most major gas appliances.

Features and Benefits

- Single piece design
- Robust material construction
- Precise tube routings
- Variable port patterns

Specifications
