

RHM-410

RHS-600475

Ranco® Pressure switches are designed to sense and act upon reaching a pre-set pressure threshold. Various pressure switch models are available for low pressure or high pressure cutouts, as well as operate control cycling.

Our switches meet a wide array of customer applications, from HVAC/R to transport and industrial systems, including situations where extreme conditions or exceptional performance are essential. Durable, reliable, and compact, our controls can be equipped with a nearly limitless variety of pressure fittings and electrical connections, making them the ideal controls for any system application.

With a dedicated team of application and support engineers around the globe, Ranco® also specifically designs and builds custom pressure switches for customers whose systems require a unique and specific pressure solution.

Ranco Pressure Switches provide a truly customized sensor in a hermetically sealed design, made out of premium materials, for virtually any application.

### Pressure Switch Specifications

Pressure Range	0-50 bar, 0-735 PSIG
Burst Pressure	345 bar, 5000 PSIG
Terminal Type	Normally Open (Low Pressure Cut-out) Normally Closed (High Pressure Cut-out)
Fluid Temperature	-65°F to 275°F / -55°C to 135°C
Ambient Temperature	-40°F to 185°F / -30°C to 70°C
Electrical Rating	
120 VAC	5.8 FLA / 34.8 LRA
240 VAC	2.9 FLA / 17.4 LRA
120/277 VAC	375 VA
24 VAC	125 VA"
Pressure Fittings	1/4" SAE FF
Electrical Connection	IP65 rated 1m wire lead cables
Lifetime (Cycles)	100,000

### Features and Benefits

- Many options available to address a wide variety of industry and end user needs: auto/manual resets, LP/HP/fan cycling controls, SPST, SPDT
- Hermetically (epoxy) sealed sensor design ensures protection from environmental conditions
- Excellent set point stability and cycle life due to a high quality, mobile switch arm
- Robust welded and potted wire leads facilitate reliable operation
- Premium sensor materials and design, including high-grade stainless steel disc for reliable lifetime performance

### Applications

- Pressure limiting
- System monitoring and alarm
- Fan cycling
- Specialty controls

# RHS AND RHM SERIES
